# IN STOCK OR CUSTOM PODS

## IN STOCK

Our in stock models are ready now. These are colour combos and appliance options that kiwis love. It's hard to wait for something this good.

## CUSTOM

Your backyard. Your layout. Tailored outdoor kitchen installed in approx 12-14 weeks. Full control over appliances and finish. Start your design today

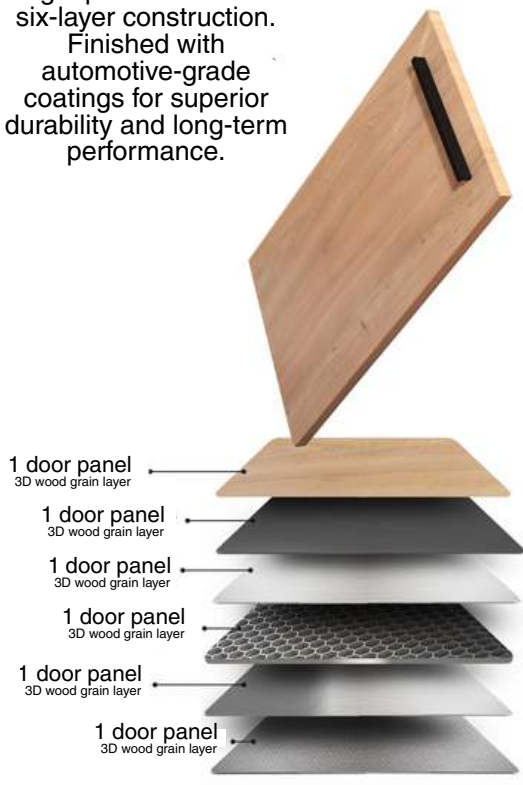

# WHY CHOOSE US?

Designed for those who host without compromise, our PODs combine premium engineering with effortless entertaining. A stainless steel BBQ anchors the space, with room for both a full size smoker and grill so cooking never interrupts the experience.

Soft close drawers, precision cabinetry, and an electronic spice rack keep everything smooth, organised, and within reach. Integrated options like a built-in TV and wireless Bluetooth speakers transform the POD into a true outdoor lounge, where cooking, conversation, and atmosphere flow together.

This isn't just an outdoor kitchen, it's a purpose built entertainer's hub.

Single-panel door with a six-layer construction. Finished with automotive-grade coatings for superior durability and long-term performance.

Reinforced with an internal stainless-steel frame, this pressure-resistant cabinet is built for long-term structural stability.

Precision-fastened hardware stays secure without loosening or stripping, even after years of use—engineered for decades of reliable performance.

## DESIGNED TO FIT YOUR SPACE

Tailor-made for any outdoor setting and aesthetic, from clean modern lines to natural wood and industrial looks.

## ALL-IN-ONE OUTDOOR SOLUTION

Seamlessly integrates grills, sinks, refrigerators, storage, and entertainment modules, everything you need for prep, cooking, storage, and hosting in one streamlined setup.

## ALL-WEATHER PERFORMANCE

UV-resistant, waterproof, and heat-resistant materials prevent fading, rust, and wear, standing up to intense sun, heavy rain, and high temperatures without compromise.

## BUILT TO LAST

A durable stainless-steel frame with sealed doors keeps dust, leaves, and wind out, protecting your equipment, keeping the cooking area clean, and extending lifespan.

# OUR 10 YEAR GUARANTEE

Our 10-year warranty isn't a marketing add-on, it's a reflection of how we build. From premium materials to precision engineering, every BBQ

POD is designed for long-term outdoor use and sustained performance. We stand behind the structure, workmanship, and core components because they're built to endure real kiwi conditions, real use, and real time.

When you invest in one of our BBQ PODs, you're covered for the long run - simple as that.

# INSTALLATION INFORMATION

## PREPARING YOUR SPACE

Your BBQ POD should be installed on a flat, solid surface such as a 100 mm concrete slab or a properly treated timber frame. For best performance and longevity, avoid placing it directly on soil or uneven ground.

## CLEARANCE & VENTILATION

To ensure safe operation and proper airflow, allow at least 150 mm of ventilation space around all sides of your BBQ POD, with a minimum of 500 mm clearance above from any flammable structures.

## WATER & POWER SETUP

If your BBQ POD includes a sink or refrigerator, a standard 10-amp power outlet and basic water in-and-out plumbing will be required. If you'd prefer a hands-off experience, we can organise this for you through our trusted, licensed contractors.

## SITE ACCESS

For delivery and installation, we'll need a clear access path at least 1200 mm wide with a level surface. If access is restricted, a crane installation can be arranged at an additional cost.

# DESIGNED WITH PURPOSE BUILT TO LAST

It's where weekends stretch longer, food tastes better, and people actually stay.

Built for how you live.

A BBQ POD isn't just a structure. Made to be used, not just looked at.

Whether it's family dinners, long lunches, or late nights around the fire, your BBQ POD becomes part of how you live at home.

If you're ready to upgrade your outdoor space properly, we're ready to build it.
